

Warning: adapting to natural gas reduces heating capacity.

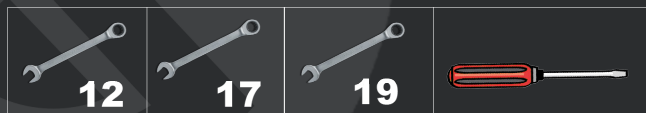

Be sure to set the network pressure: minimum 0.5 bar and maximum 3 bar. If the pressure is lower or higher, you need to use a system such as a booster to bring it up to the right pressure.

You can buy the Ripack3000 already adapted for natural gas or purchase an adaptation kit below.

NATURAL GAS KIT

Code	Pressure
240092	From 0,5 to 0,8 bar (50 kW)
240093	From 0,8 to 1,0 bar (50 kW)
240094	From 1,1 to 1,4 bar (50 kW)
240095	From 1,5 to 2,0 bar (50 kW)
240096	From 2,1 to 2,5 bar (50 kW)
240097	From 2,6 to 3,0 bar (55 kW)

If 0,5 bars < pressure < 2,5 bars
If 7 psi < pressure < 36 psi

If 2,5 bars < pressure < 3,0 bars
If 36 psi < pressure < 44 psi
